REC Project Minutes 2020.07.16

Attendees

- Paul Carver
- Darrin Vallis
- Tina Tsou

Agenda

- Summary of REC testing on Ampere

Minutes

- Paul Carver reported that REC install on Ampere servers went well but required a manual step on the first server in the cluster in order to boot off of DVD image. Darrin Vallis reported that the manual step was due to a minor problem with IPMI that has already been resolved and he has been able to run the install without the manual intervention.
- Tina Tsou suggested possibly a 00 UTC timeslot for the meeting to accommodate China participants as well as California. Paul Carver will send out a poll to the mailing list for a new meeting timeslot. It will be challenging to find a timeslot that works well for both the US East Coast and China.
