

BluVal Feature Project Next Steps

- BluVal supports K8s conformance for v1.16 versions and lower
- Need for uplift to support later K8s versions greater than v1.16 up to the latest stable v1.20 release
- Last commit on BluVal project was in July 2020
- Enhance BluVal by integrating additional tests such as those specified by Anuket in RC2 [CNTT/doc/ref_impl/cntt-ri2/chapters at master · cntt-n/CNTT · GitHub](#) consistent with requirements of new 5G Blueprint (see next slide) <https://www.sdxcentral.com/articles/news/onap-honolulu-swells-to-the-mainland/2021/05/>
- Improve overall user experience, leverage BluVal UI [Login \(akraino.org\)](#)
- Integrate enhancements by security sub-committee to display PASS/FAIL criteria
