Contents

1. Akraino Overview
2. Akraino Internal Activities
3. Akraino External Activities
4. Questions
1. Akraino Overview

- 20 < Blueprints (aka Integration Projects), BPs Proposals & Feature Projects
  - set of Open Infrastructures & Application Blueprints (BPs)

- Coordination & Co-operation with Multiple Upstream Open Source Communities/SDOs as:
  - Airship,
  - LFN Anuket
  - OpenStack,
  - LFN ONAP,
  - LFN EMCO,
  - ETSI MEC,
  - GSMA,
  - TIP,
  - CNCF
  - O-RAN

Objective: To deliver a fully integrated stack
Akraino Project (Blueprint) Lifecycle States and Reviews phases

- Five (5) states that Projects goes through.

- A Project Lifecycle may **extend across** Multiple Projects & Akraino Releases.

- The Procedure of moving from one (1) State to the next one is **independent from the Akraino Release Lifecycle** and the pace depends on each individual Project.

- In order to effectively review Project progress, **four (4) Reviews** are built-in to the Project Lifecycle, namely,

  1. Proposal,
  2. Incubation,
  3. Mature,
  4. Core
  5. Archived

New Blueprints for R5

- Smart Cities
- MEC-based Stable Topology Prediction for Vehicular Networks
- Multitenant Secure Cloud Native platform (ICN-MTSCN)
R5 Updates to Existing Blue Prints

- Connected Vehicles
- IEC Type 4: AR/VR oriented Edge Stack for Integrated Edge Cloud (IEC) Blueprint Family
- ICN – Integrated Cloud-Native Family
- ELIOT IoT Gateway Blueprint
- ELIOT SD-WAN/WAN Edge/UCPE Blueprint
- Network Cloud and TF (Tungsten Fabric) Integration Project
- Network Cloud and TF (Tungsten Fabric) Integration Project
- The AI Edge: School/Education Video Security Monitoring
- The AI Edge: Intelligent Vehicle-Infrastructure Cooperation System (VICS)
- 5G MEC/Slice System to Support Cloud Gaming, HD Video and Live Broadcasting Blueprint
- IEC Type 3: Android cloud native applications on Arm servers in edge for Integrated Edge Cloud (IEC) Blueprint Family
- IEC Type 5: SmartNIC for Integrated Edge Cloud (IEC) Blueprint Family
- Enterprise Applications on Lightweight 5G Telco Edge
- Public Cloud Edge Interface (PCEI) Blueprint/Public Cloud Edge Interface (PCEI) Blueprint
- IoT Workloads at the Smart Device Edge – Predictive Maintenance (with a Thermal Imaging Camera, vibration sensors, etc.)

- The AI Edge: Federated ML application at edge
- KubeEdge Edge Service Blueprint
- Private LTE/5G ICN Blueprint
- IEC Type 2 for Integrated Edge Cloud (IEC) Blueprint Family
09/28/2021 Akraino R5 Webinar: Expanding the Edge

Skapad av Tina Tsou, senast ändrad av Asif Mehmood den sep 28, 2021

VIRTUAL SCHEDULE AT-A-GLANCE

**Tuesday, SEPTEMBER 28**

- 09:00 – 10:00 PDT (UTC-7)  
- 12:00 – 13:00 EDT (UTC-4)  
- 18:00 – 19:00 CEST (UTC+2)  
- 00:00 – 01:00 CST (UTC+8) *(Thursday)*

Date Time: Sep 28, 2021 09:00 AM Pacific Time (US and Canada)  
Topic: Akraino R5: Expanding the Edge

Here is the link to register for the webinar -- please share this with your friends and colleagues: [https://zoom.us/webinar/register/WN_xnujJxiTJa9irf9h0_rnw](https://zoom.us/webinar/register/WN_xnujJxiTJa9irf9h0_rnw)

Description: Akraino is an open source software stack that improves the state of edge cloud infrastructure for carrier, provider, and IoT networks. It offers new levels of flexibility to scale edge cloud services quickly, to maximize the applications or subscribers supported on each server, and to help ensure the reliability of systems that must be up at all times.

Join the community for a webinar outlining the newest blue prints available in the latest release, Akraino R5, covering new uses cases for:
In a stand-out finding of interest to our Telco Customers, 95% of respondents from the Telecommunications Industry report using Open Source.

The high-level takeaway of the report is that: "using Open Source SW across all Industries is no longer principally about making best use of IT Budgets. Lower Cost of Ownership has fallen off the top spot and now sits in sixth (6th) position."

Today, the Strategic Benefits of using Open Source are valued more, including:

1. Higher quality software 35%
2. Access to latest innovations 33%
3. Better security 30%
4. Ability to safely leverage open source technologies 30%
2. Akraino Internal Activities 7 - Akraino SW, Innovation & Security
Akraino Edge Stack
Security Sub-Committee

September 24, 2021

Daniil Egranov
Security Sub-Committee Co-Chair, Akraino

Randy Stricklin
Security Sub-Committee Chair, Akraino
Akraino Security Team 2021 Accomplishments

› Automated Lynis, Vuls and Kube-Hunter Log Output Pass/Fail Analysis
› Lynis – Reviewed Required Tests
  › Formalized and Documented Lynis Incubation vs Maturity Requirements
› Platform Security for Akraino Blueprints
  › Arm
  › x86
› Release 4 and 5 Blueprint Reviews
Akraino Security Team Future Plans - 2022

› Develop Minimum OS Version Support Document
  › Ubuntu, CentOS, RHEL CoreOS, Debian

› Develop Minimum Security Tool Version Support Document
  › Lynis, Vuls, Kube-Hunter, and OVAL (Vuls) database

› BluVal (Blueprint Validation):
  › Integrate Automated Lynis, Vuls and Kube-Hunter Pass/Fail
  › Enforce minimum versions of Vuls, Lynis and Kube-Hunter

› Version 1.0 Platform Security Whitepaper

› Investigate using LFX Security
2. Akraino Internal Activities 9 - Akraino Regional Communities

Akraino China Community - Downstream Lab 1 (China South, mainly Arm architecture initially)

Akraino China Community - Downstream Lab 2 (China North Architecture/Vendor Neutrality)

Benefits all the architecture irrespective of ARM or X86. It benefit Akraino community as a well.

Kuralanmudhan Ramakrishnan @YJEL

IN PERSON & VIRTUAL SCHEDULE AT-A-GLANCE

When: Tuesday, November 23

<table>
<thead>
<tr>
<th>Time</th>
<th>IST</th>
<th>UTC+1</th>
<th>UTC-5</th>
<th>UTC-8</th>
</tr>
</thead>
</table>

Date Time: Nov 23, 2021 10:30 AM - 2:30 PM PST (US and Canada)
Topic: Akraino Reunion Meeting

Where: HanaHaus + Blue Bottle Coffee

Address: 456 University Ave, Palo Alto, CA 94301
websites: HanaHaus (click on Palo Alto), bluebottlecoffee.com

Proposed / Working Agenda, subject to modification (please modify as needed)

1. 2022 General Planning
   1.1. How can we better promote and/or market Akraino strengths
   1.1.1 Conduct technical meetups and seminars, create a template and apply it across the community (Kural)
   1.1.2 Blueprint diversity (Jeff)
   1.1.3 Co-existence of Hyperscalers and Telecoms (Jeff)
   1.1.4 Blueprint release security requirements (Randy)
   1.1.5 API database (API usage info gathering, API map, collaboration with ETSI MEC DECODE) (Jane, Oleg)

2. Discuss and identify key edge computing trends for 2022

3. Look for ways to increase standards compliance and encourage interoperability between blueprints (Ike)

4. Brainstorming ideas to increase Akraino participation and user contribution
   3.1 Akraino China Community run by OpencG (Tina)
   3.1.1 Discuss x86 pilot blueprint for example, demonstrate x86 compatibility of GCC lab machines (Jeff)
   3.2 TSC meetings increased participation – assign TSC members to recruit interesting "keynote speakers" for Tuesday TSC members to recruit well, for example a small cash prize, points gained for next TSC election, etc (Jeff)

5. Existing Blueprint Areas
   5.1 Automotive

6. New Blueprint Areas for 2022
   4.1 Robotics (Jeff)
   4.1.2 Fujitsu presentation (Fukano-san, 10:30a)
   Introduction to SSESSensor-Rich Soft End-Effect System
1. Use of ETSI MEC architecture in Akraino BPs. Some BPs already explicitly refer to ETSI MEC in their architecture (e.g., EALTEdge). Some BPs are “mappable” to ETSI MEC architecture (e.g. PCEI). Maybe we should include an optional architecture section in BP architecture documents that shows the alignment with ETSI MEC.

2. Direct implementation of ETSI MEC services and APIs in Akraino BPs

3. Participation in ETSI MEC Hackathons and/or Plugtests. Akraino BPs and releases are essentially a “continuous hackathon”. Given that many Akraino BPs provide solutions for Edge Computing, we should find a way to “channel” Akraino BPs as ETSI MEC hackathon projects as well.

4. Include MEC specs in LF Edge Akraino API map, using either the existing Blueprint-organized map or a different basis of organization

5. Conduct architectural mapping and analysis between sample Akraino Blueprint projects (For example, PCEI) and appropriate MEC reference architecture

6. Promote MEC APIs in Akraino Blueprint projects, specifically MEC009 API design generic guidelines

7. Map, analyze, and compare Akraino Federated edge projects with MEC Federation specifications

8. Focus on implementing specific MEC use case categories (e.g., IoT, URLLC, Vehicular) in Akraino BPs
ETSI MEC Update of the collaborations with OpenSource, with special focus on LF Edge Akraino

Presented by: Jane Shen,
VP of Technology Strategy, Mavenir
Technical Expert, ETSI MEC ISG

© ETSI 2021

15.11.2021
The OPG believes that, for Operators to develop a Federated Edge Computing Platform such as the OP, Requirements must be enforceable in Contracts by a Published Set of Standards.

To this end, the OPG proposes selecting ETSI ISG MEC and 3GPP to provide a Standard Reference for an Edge Service End to End (E2E) definition.

We note that 3GPP EDGEAPP Architecture and ETSI ISG MEC Architecture could complement each other in a way that is acceptable to OPG:

![Diagram of OPG's Relationship between ETSI ISG-MEC and 3GPP EDGEAPP architectures]
ETSI MEC Update of the collaborations with OpenSource, with special focus on LF Edge Akraino

Presented by: Jane Shen,
VP of Technology Strategy, Mavenir
Technical Expert, ETSI MEC ISG

© ETSI 2021

15.11.2021
3. Akraino External Activities 1 - LF Edge Akraino and ETSI MEC Co-operation - 4

Enterprise Application on Lightweight 5G Telco Edge Use Case

- MECM Center Node
- MEC Host1
- MEC Host2
- Retail Edge 1
- Retail Edge 2
- Smart retail stores on Remote sites (ROBs)
- Part 2: In a cloud scenario, shared Applications and Data are deployed with backup and review of edge sites to remote cloud nodes.

PCEI Release 5 Overview

- NBI APIs
- NBI Integration
- Dynamic Edge Cluster Registration
- Dynamic App Host and Container Orchestration
- Automatic creation of Service Instance in MEC/ETSI and deployment of Apps
- Automatic Termination Plan Execution

- Integrated Traffic Plan Exec
- Azure (PCC)
- AWS (PCC)
- Equinix Fabric Interconnect
- Equinix Metal (Bare Metal Cloud)
- Openstack (SFC)
- Equinix Fabric Interconnect
- Multi-Cloud Partition Core (PCC) Orchestration
- Kubernetes Edge
- Openstack Edge
- Cloud Native 5G UPF Deployment

PCEI Use Case in ETSI MEC Plugtests 2021

- ME/C013 Location API Spec
- Swagger
- Node.js
- Docker

- Containerize Server Code
- Generate Helm Charts
- Kubernetes
- generate Helm charts for the code to make it deployable on Kubernetes

- Generate PCEI Orchestrator as a MEC/MEPM to:
  - Onboard ME/C013 Location API server as a Service/App
  - Deploy Equinix Metal server (MEP/MEC server)
  - Onboard Kubernetes to MEPM server
  - Onboard Kubernetes cluster to PCEI Orchestration
  - Deploy ME/C013 Location API Service (as MEPM App)
An API Portal For Edge Developers

- An API info hub of Akraino projects
- Cross reference with other relevant API information sites, e.g. ETSI MEC wiki, forge.etsi.org etc.
- Highlight API offerings from Akraino projects

https://apiportal.Akraino.org

09/15/2021 Akraino IoT Area Webinar / Regional Developer Meetup - Africa

The Linux Foundation Akraino community will conduct a workshop on Wednesday, September 15 (Local time, GMT+2) online.

**Registration Link:** [https://zoom.us/meeting/register/TJItceGvqDouGd1ToS3OyzaVb_Sb16eDDPZz](https://zoom.us/meeting/register/TJItceGvqDouGd1ToS3OyzaVb_Sb16eDDPZz)

On September 15, 2021 (9.00am - 2.00PM PST) the Akraino community will participate in a partner event online.

Launched in 2018, and now part of the LF Edge umbrella, Akraino is creating an open-source software stack that supports a high-availability cloud stack optimized for edge computing systems and applications.

Designed to improve the state of edge cloud infrastructure for enterprise edge, OTT edge, and carrier edge networks, it offers users new levels of flexibility to scale edge cloud services quickly, to maximize the applications and functions supported at the edge, and to help ensure the reliability of systems that must be up at all times. The Akraino Edge Stack blueprints use several upstream open-source projects such as ORAN Alliance, CNCF, Openstack, ONF, ONAP, TIP and the community works with open-source communities to enhance any missing edge functionality.

This workshop will provide an overview of leading use cases of Edge computing systems and applications in Africa with a focus on V2X, IoT and Enterprise Edge solutions.

With key presentations from leading African infrastructure stakeholders, this workshop will provide a unique opportunity to gain unique insights on current infrastructure solutions across the African continent as well as specific technology approaches for the fastest growing industry verticals. In addition to providing detailed coverage of topics related to the current state of Edge computing on the African continent, there will be an opportunity for peer networking to connect with fellow professionals and expert industry practitioners.

There is no cost to attend the event and we encourage everyone interested in edge computing infrastructure and related opportunities in Africa to attend.

**Agenda:**

**Workshop, Wednesday, 2021-Sep-15, 9.00am - 2.00 p.m PST**

**Location:** Zoom link will be emailed to you after you register

11/24/2021 Akraino presentation to KICS on IoT (Korean Institute of Communications and Information Sciences)

Skapad av Ike Alisson, senast ändrad den dec 30, 2021

Akraino presentation to KICS on IoT (Korean Institute of Communications and Information Sciences) about update on Open Source and Standard trends related to 3GPP 5G and oneM2M IoT SL (Service Layer) Global Standard evolvement.

KICS is the largest ICT Institute in Korea with over 26,000 members, 50 members, 8 domestic and 5 overseas chapters, and 30 specialized Research Groups. As the growth engine and leader of ICT in Korea that has achieved the greatest accomplishments in the world, KICS provides open networks for Universities, Corporations, Government-affiliated Agencies and Research Institutes to engage in Academic activities, Technical Cooperation and Policy Reviews in the fields of ICT-based Communications, Broadcasting and ICT Convergence Industries. Today, with the upcoming future driven by the Fourth (4th) Industrial Revolution, KICS is opening a new future for ICT with the pride and passion that led Korea’s Information and Communications Technology that amazed the world. KICS is at the heart of the limitless competition of the Fourth (4th) Industrial Revolution. For further information about KICS, please visit the KICS web site: https://eng.kics.or.kr/html/?pmode=intro
