5G Edge Computing Exploration and Practice from Tencent

Wei Chen
Tencent

Edge Computing enables 5G, IoT and AI for industries

Scenarios

Cloud Gaming

Smart Office

Industry Internet

Connected Car

Intelligent Medical

AR/VR

Live Broadcasting

HD Video

Problems & Requirements

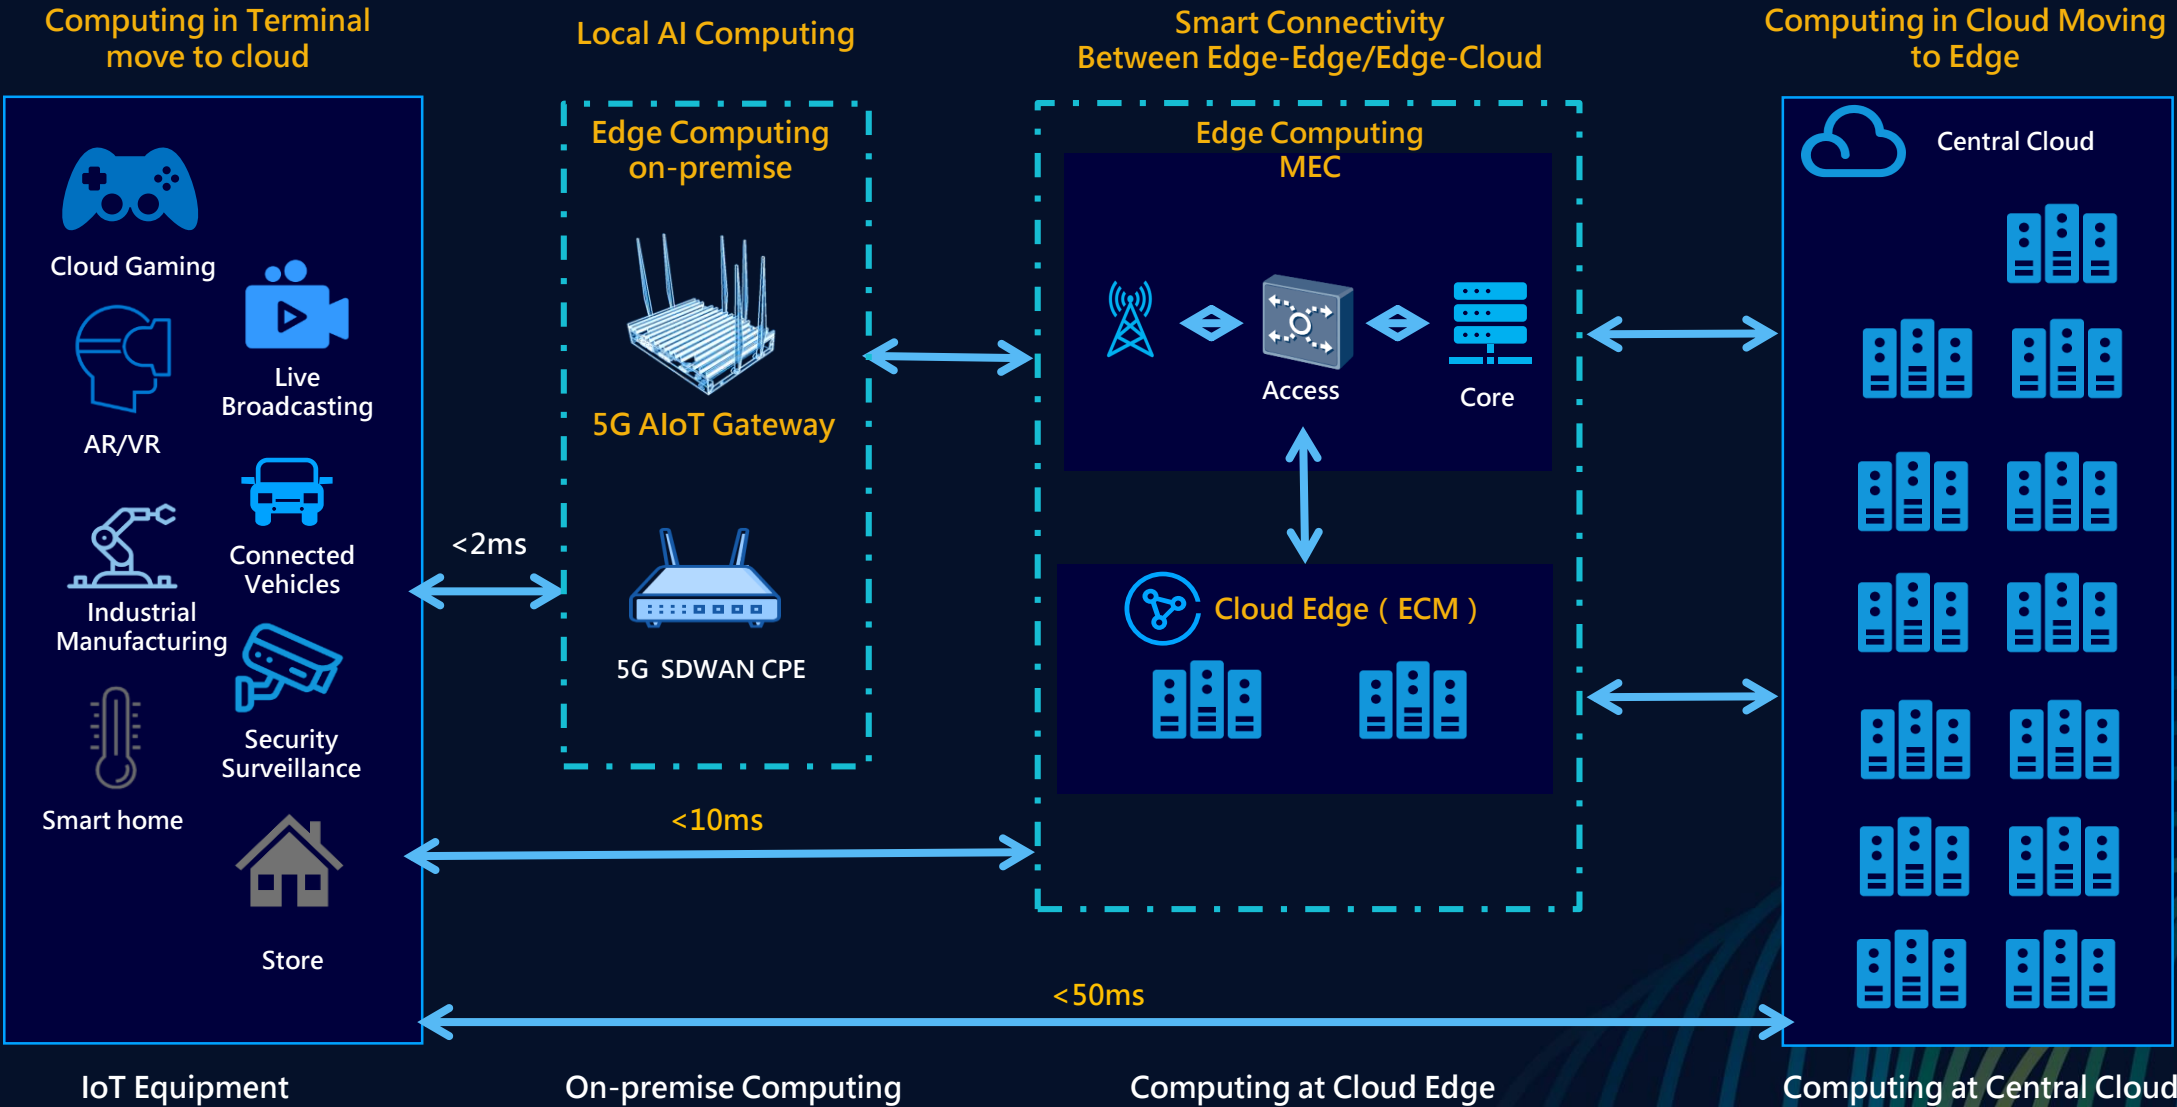

- Higher network bandwidth and lower latency to enable service into edge cloud
- Reduce the device and bandwidth cost, e.g., cloud gaming
- High network connectivity

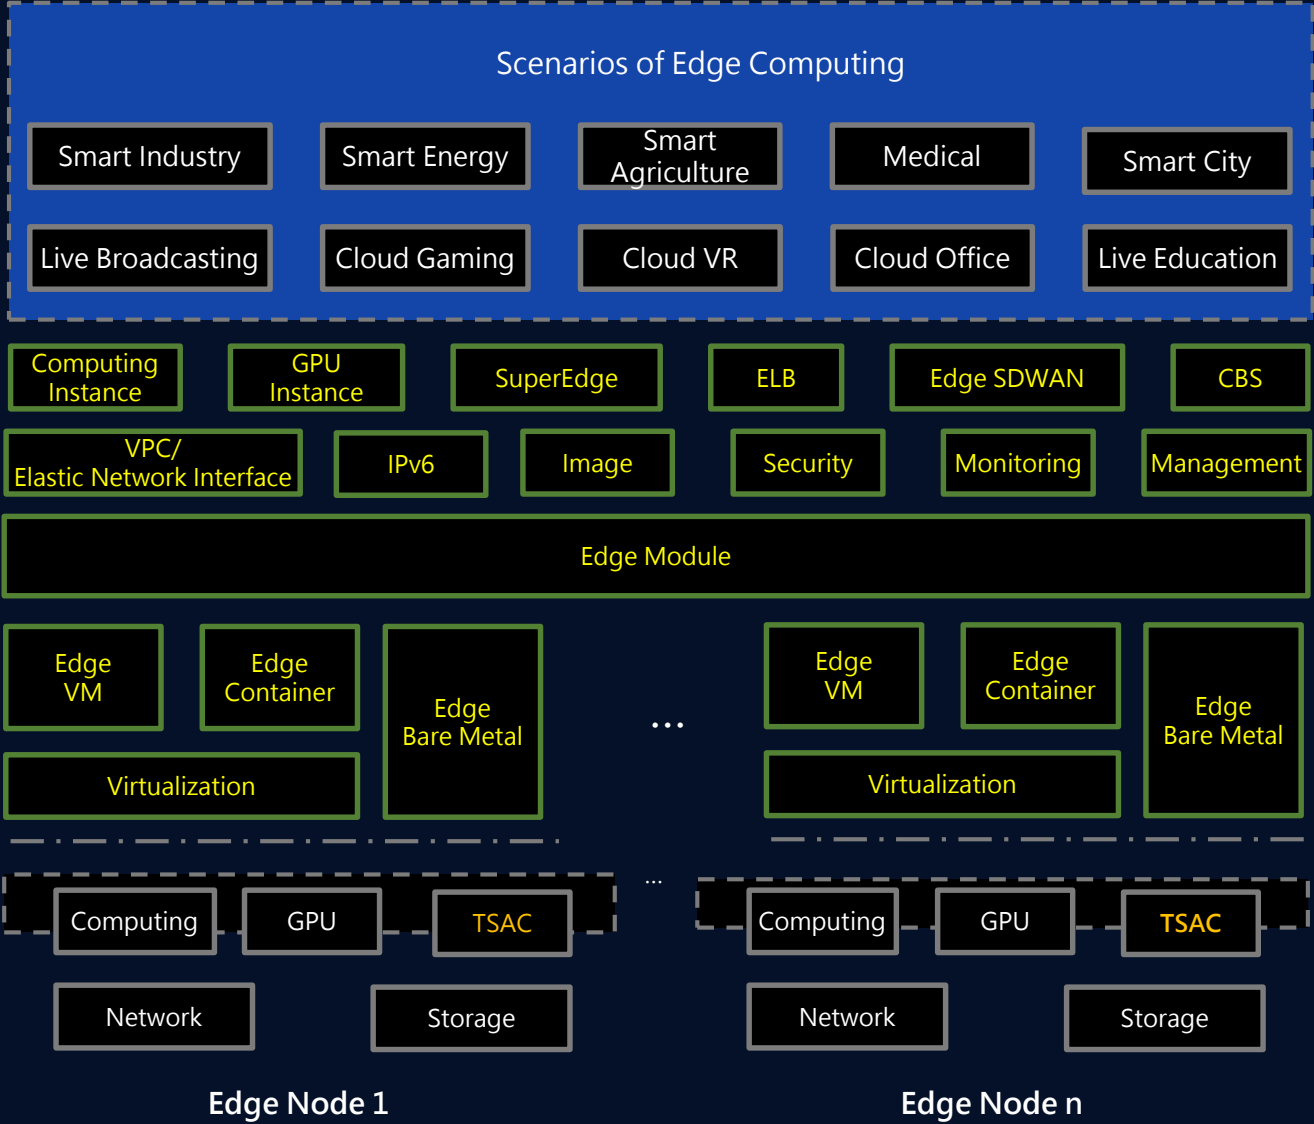

Technologies

- Edge computing
- Security
- AI in Edge
- IoT capability enhancement
- 5G acceleration: Slice/QoS

5G Smart Edge Computing Enables E2E infrastructure

ECM build Cloud Edge infrastructure

ECM : Edge Computing Machine

Low Cost

Cloud-Edge Collaboration, Consistent Experience

Low Latency

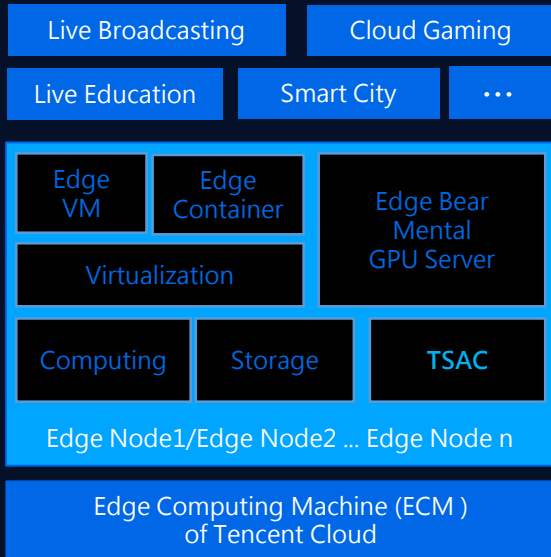

Mobile User Access (4G/5G)

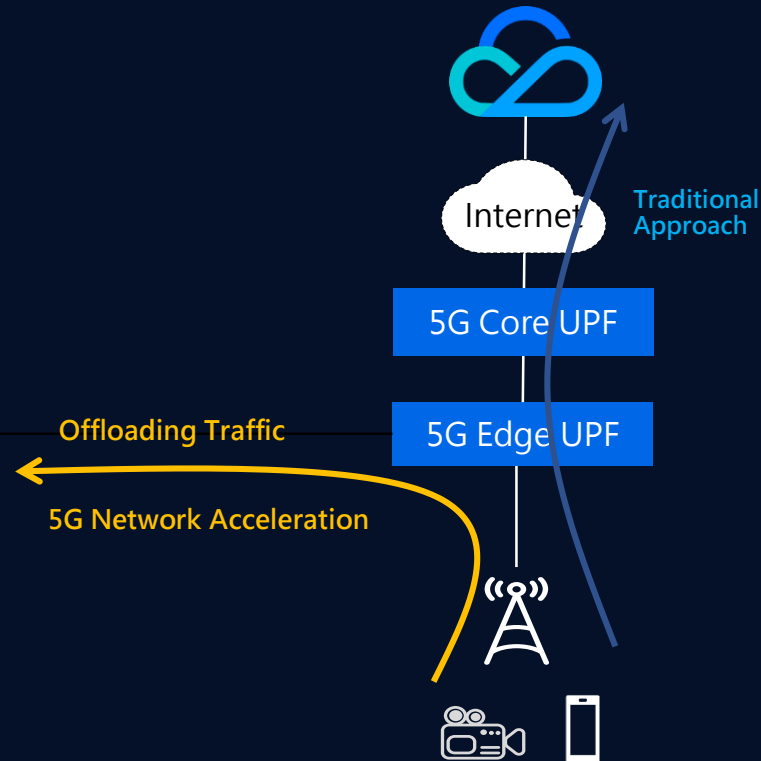

Fixed/WIFI Access

TSAC+ECM : Providing 5G Edge Capability of "Computing" and "Connecting"

Edge Cloud and Service

Center Cloud and Service

TSAC : Tencent Smart Access Connector

Low Latency 5G User Connecting to the edge Service

- Network delay reduced by 20%~50%
- Traffic offloading based on IP address or DNS domain name

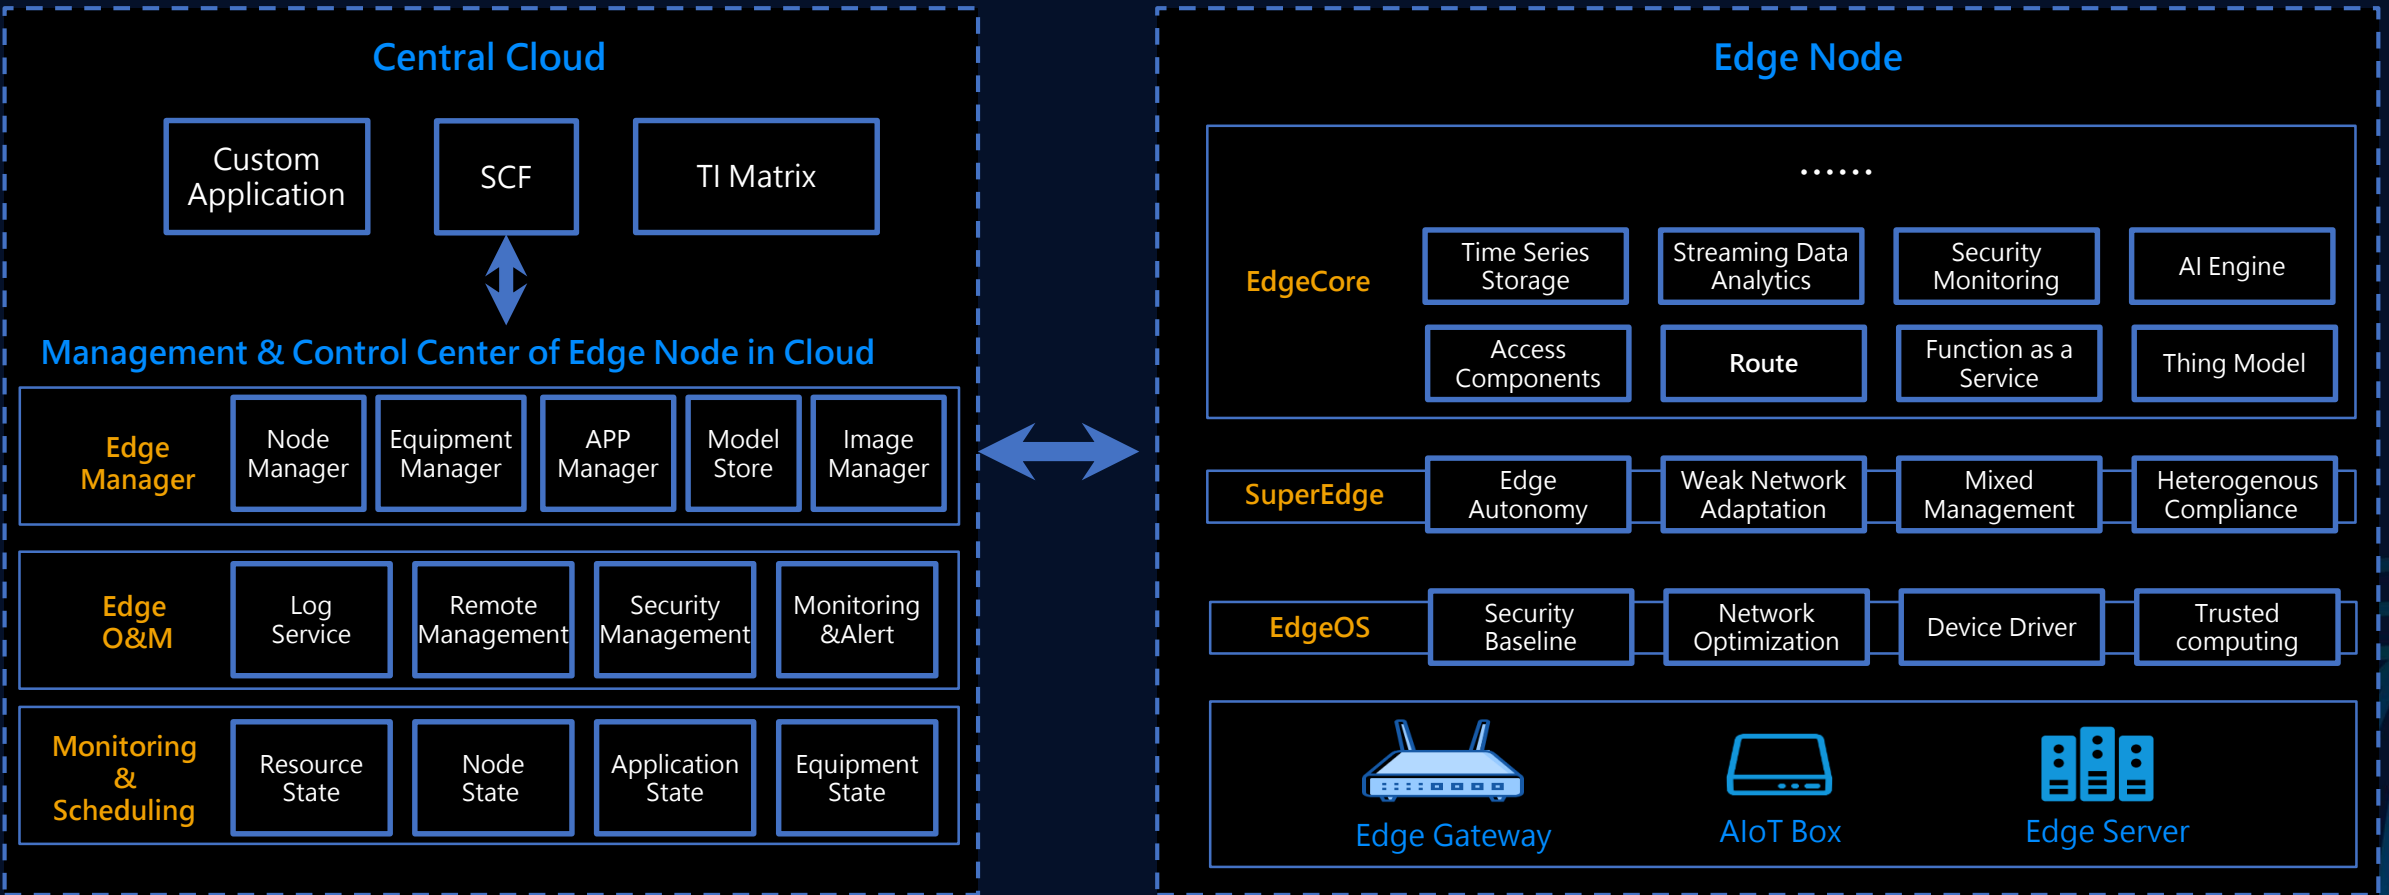

Network Acceleration

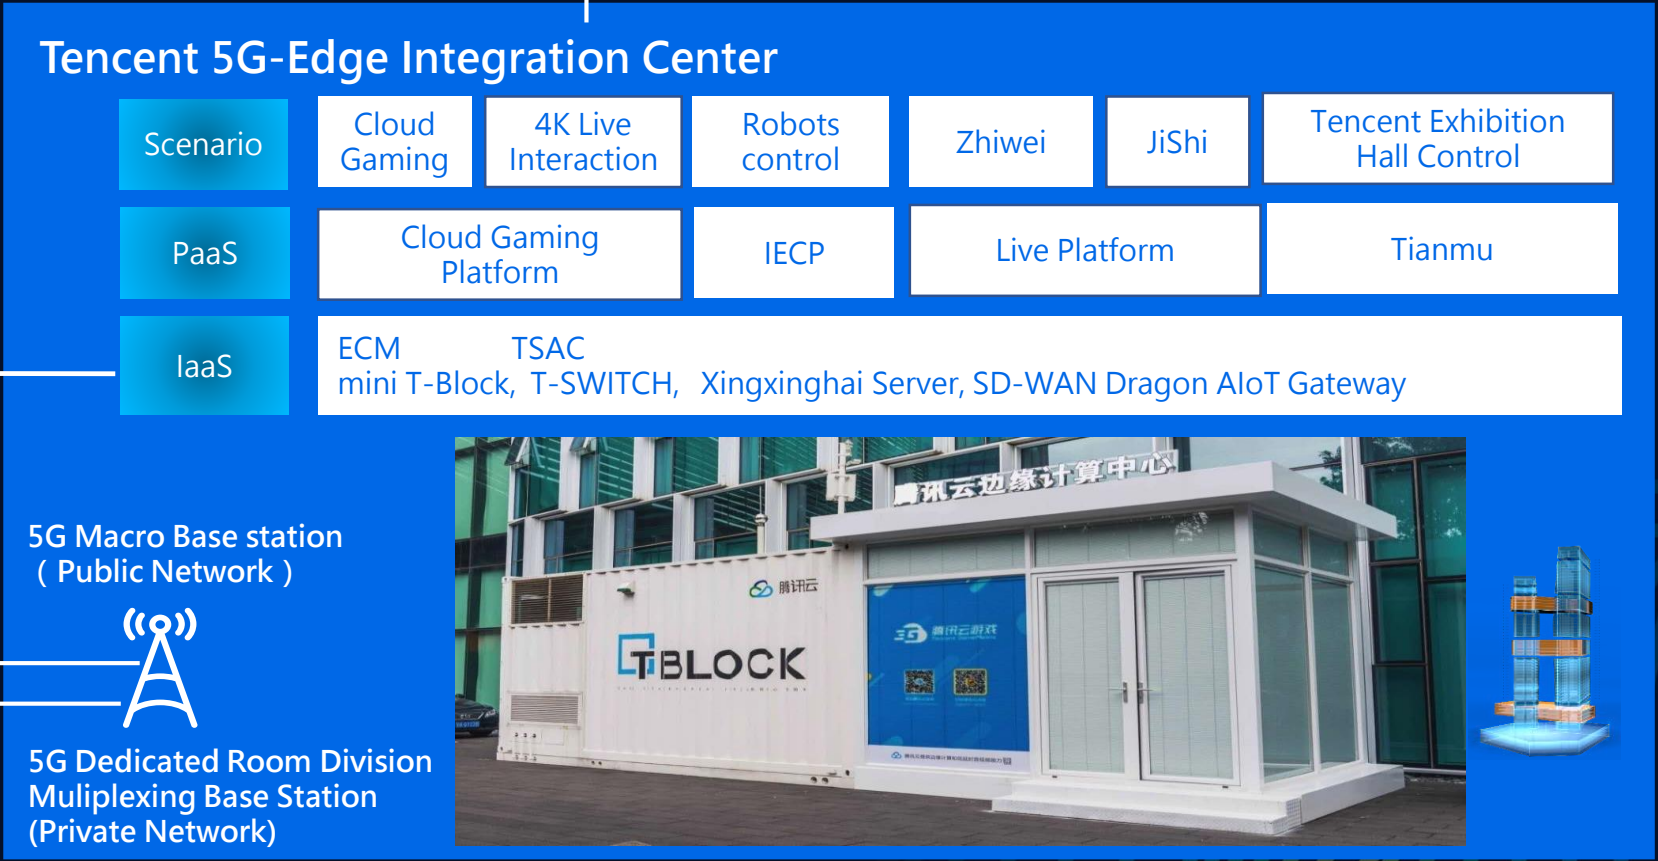

Testing result in case of 5G network congestion :

- Without Slice : Frame-Rate 30 FPS · RTT 41ms · Bit-Rate 4.5Mbps
- With Slice : Frame-Rate 60 FPS · RTT 20ms · Bit-Rate 12.7Mbps

on-premise Edge Computing: IoT Edge Computing Platform (IECP)

>>> Practice 1: Tencent 5G Edge Computing Center is officially Opened at Binhai

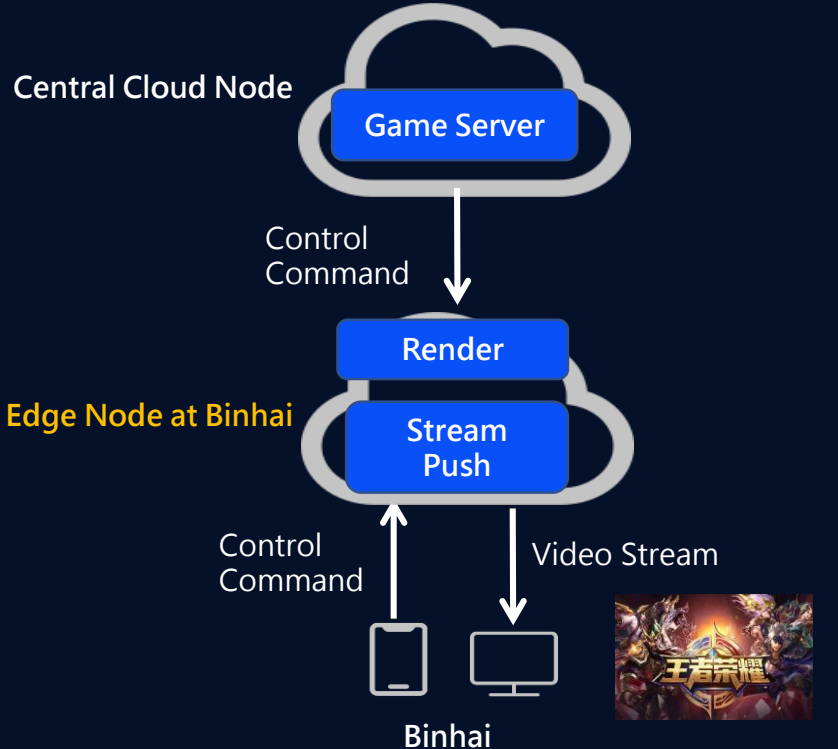

5G Macro Base station (Public Network)

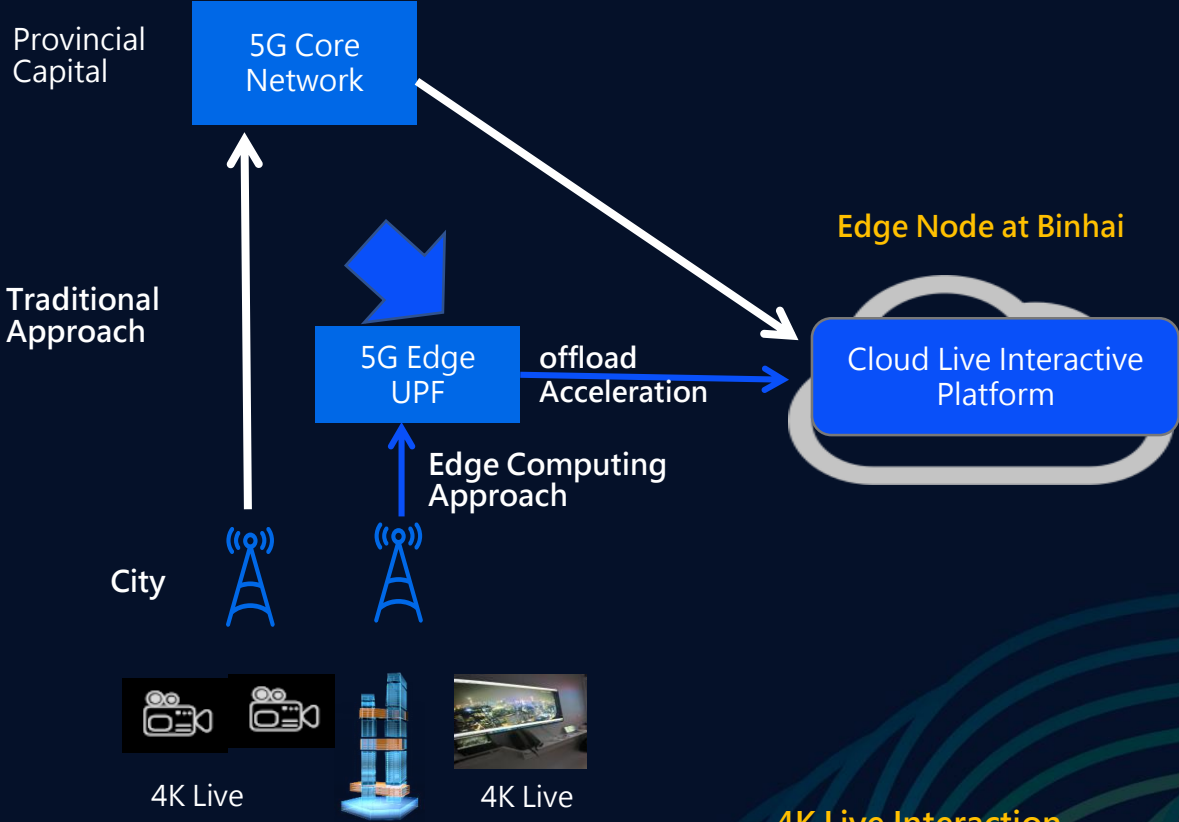

5G Dedicated Room Division Multiplexing Base Station (Private Network)

Practice 1 (Cont.): Cloud Gaming, 4K Live Interaction

Cloud Game
Nearest rendering, low latency, large bandwidth, low bandwidth cost

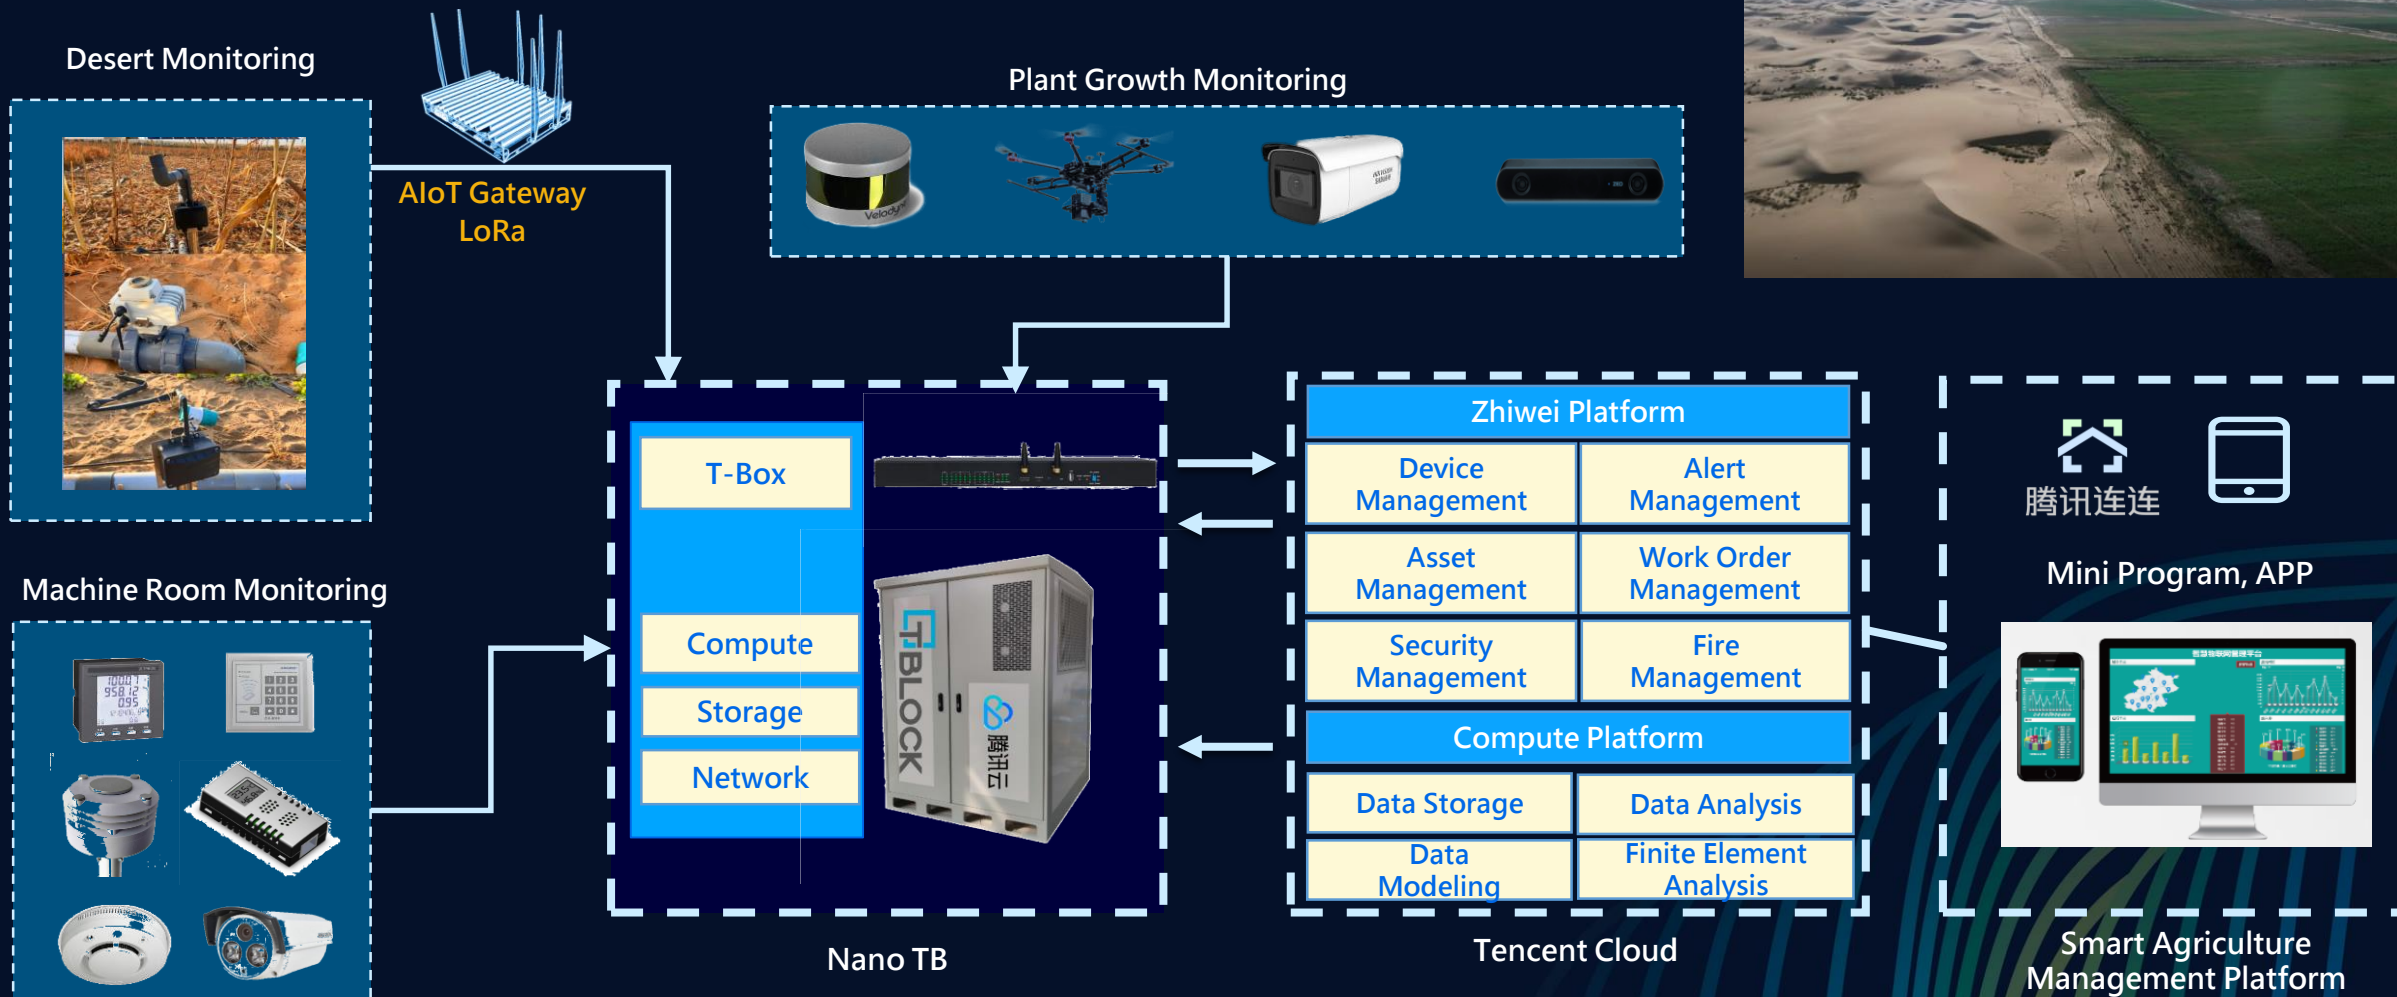

4K Live Interaction

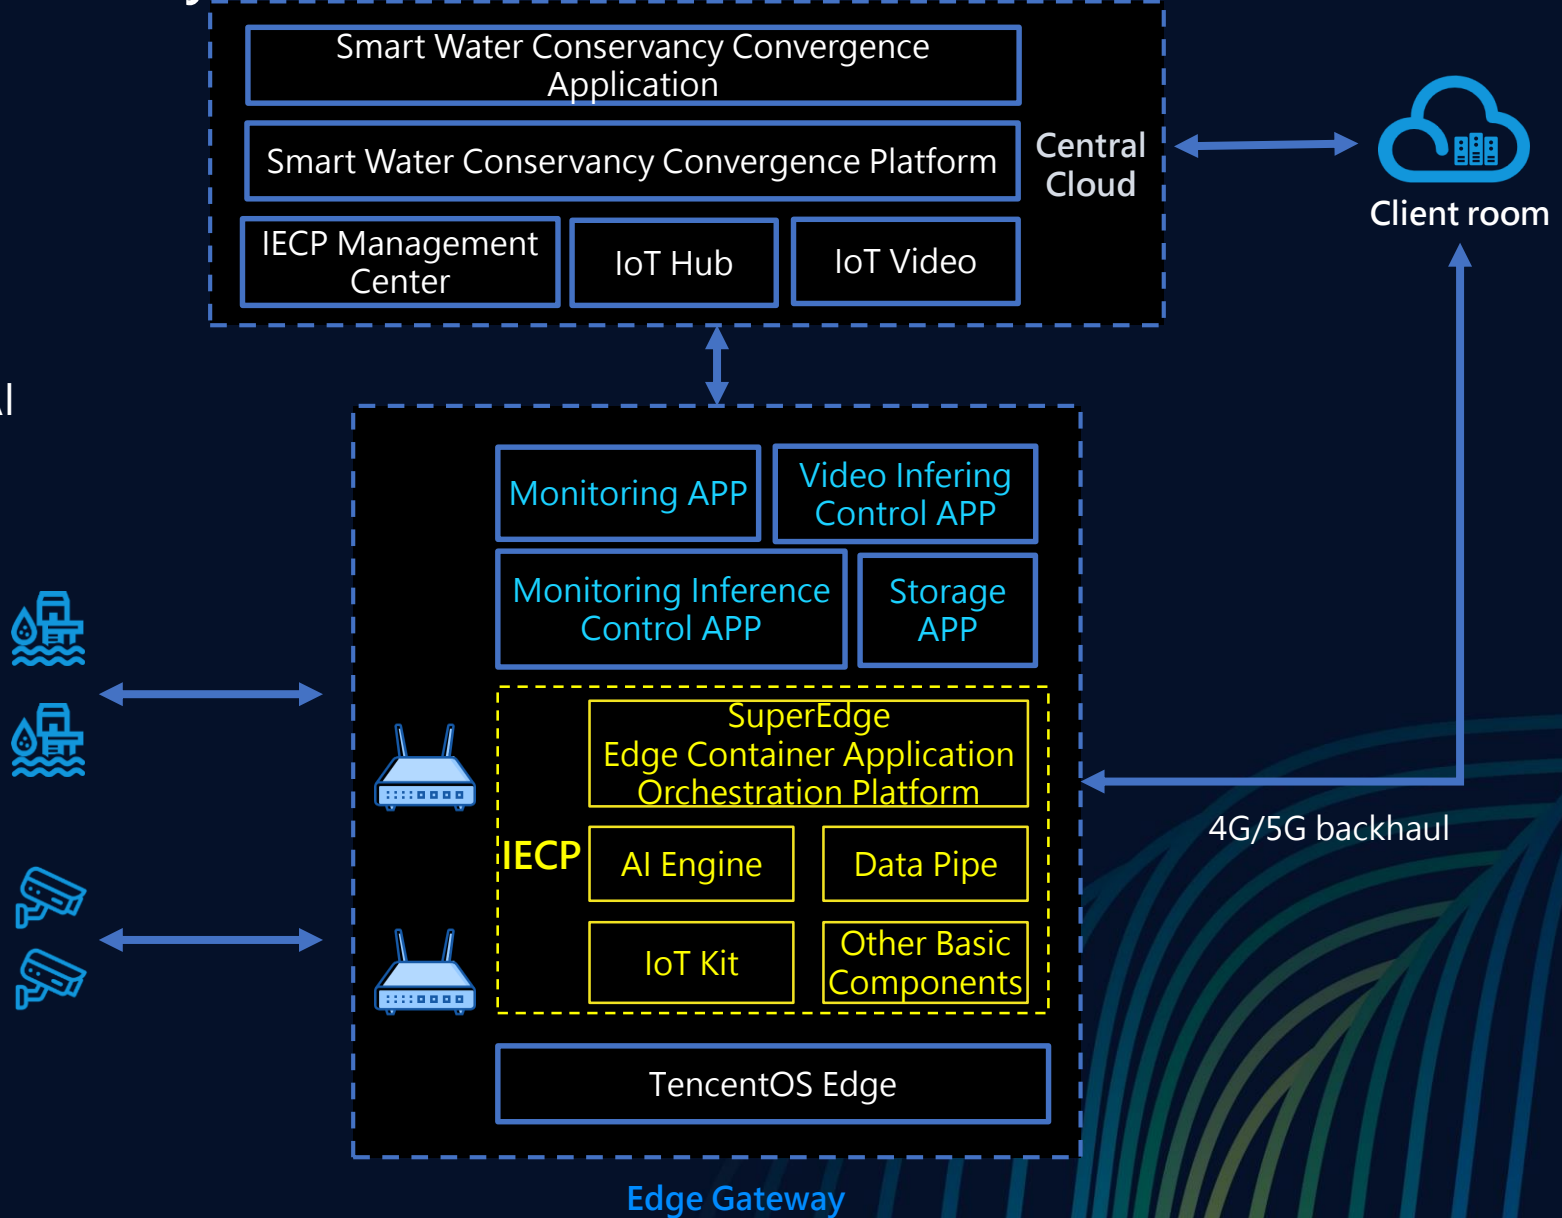

Tencent Cloud Interactive Live Broadcasting Platform and Solutions

Practice 2: Boosting the Soil Transformation of Alashan Desert and Restoring the Ecological Environment

Practice 3: Smart Water Conservancy

- 1. out-of-the-box experience
- 2. Cloud edge collaboration with the powerful capability of AI reasoning and AI training

Thanks!
