The Pivotal Moment of Edge Computing

The Edge

2021 - The raising of Edge Networks

2021 Sep. / Cloudflare Pages

Cloudflare Announces Cloudflare Pages, Brings Next Generation Website Development Platform to Businesses and Developers

New platform delivers the fastest and most scalable websites distributed on the edge

Cloudflare Pages - 2021 Sep.

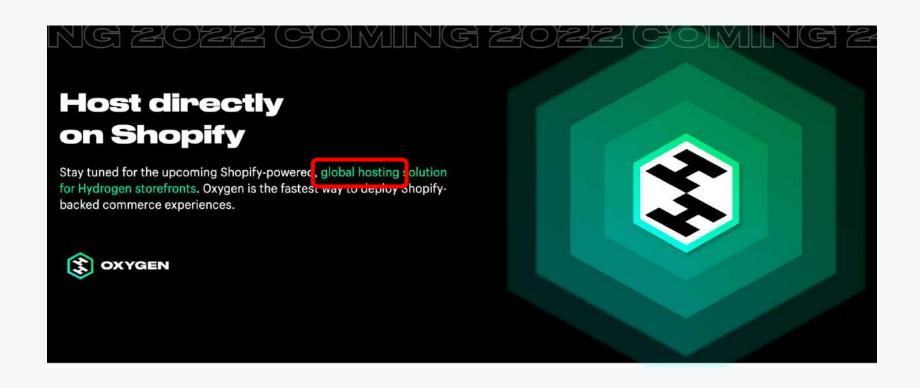

Cloudflare Pages is the most secure and most scalable Jamstack platform to build and deploy your sites on the edge. But how is Pages so fast?

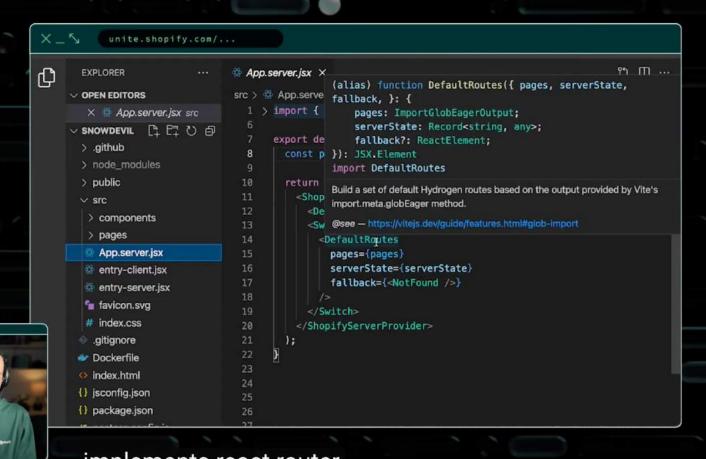

It comes down to three key reasons:

- Pages is built on one of the fastest networks in the world, putting us within 50 ms of 95% of the world's Internet-connected population. Delivering Pages from this network is the basis of our speed.
- Cloudflare helps define and implement next generation standards, like QUIC
 + HTTP/3 and Early Hints, that push Pages performance to the next level.
- Pages has a killer developer experience that makes it easy to build the fastest websites on the planet.
