REC Project Minutes 2020.03.05

Attendees

- Paul Carver
- Darrin Vallis
- Alex Antone
- Tina Tsou
- Wenhui Zhang

Agenda

- Review slides from the Akraino meeting if anyone didn’t see them.
- Continuous deployment failure has been resolved. The cause was an incompatibility between facter-3.9.3-7 and leatherman 1.10.0-1. TA does not explicitly install or configure leatherman, but it comes from the CentOS EPEL repo and was recently bumped by them from 1.3.0-9 to 1.10.0-1. Some of the Ansible playbooks use facter to gather facts about the system in order to drive certain config changes.

Minutes

- Paul provided an overview of the slides that he presented at the Akraino two day meeting
- Alex is working on the upstreaming of the ARM images for RIC
