

REC Project Minutes 2019.08.22

Attendees

- [Paul Carver](#)
- and others - I didn't take attendance

Agenda

- None prepared

Minutes

- ARM support status
 - Alex is working on an ARM QCOW
 - Changes needed in hardware detector and virtual media
 - The specific ARM hardware that is currently being used only supports virtual media via a Windows share. This is not desirable and not specific to ARM in general, just the specific servers that Alex has available to him at the moment
 - Alex is currently debugging on a temporary x86 machine as a preliminary workaround to working on ARM
