

Lab Topology Template for BluePrints

The following document will help as requirements checklist that need to be included in the presentation that each Blueprint is required have at the CI Blueprint Validation Lab subcommittee:

- Pod overview
- Key Contacts
- CI or CD business logic
- Time frame by milestone
- BoM (physical and virtual)
- Physical connectivity
- Logical connectivity (where applicable)
- Detailed communication flow and port required
- Dependencies with LF services (Jenkins, Nexus, among others)
- VPN users
- Opens

Each Blueprint designated contact will request a time slot to present at the Ci Blueprint validation lab subcommittee call through the mail list, with their respective information package. However the format has to be uploaded at least 24 hrs before the call happens. Members of the subcommittee and UNH IOL will be present for review.
