

Test Set Proposal to TSC

Draft proposal deck including details of mandatory test sets for HW, OS, K8s and Openstack for Feature Validation Project R2:

https://docs.google.com/presentation/d/1ONU7jmeGVrhbJe2gKRtode1aHKH8teRgfN91LYAPBmo/edit#slide=id.g5b6aa4c102_0_0

NB: The Kubernetes tests do not run the full conformance test – one test case has been blacklisted. The reason is that

- Conformance tests on ARM64 architecture work with Kubernetes version 1.15 which has all necessary patches included
- Kubernetes 1.15 conformance tests have an additional test case (Aggregation) which does not work on earlier Kubernetes versions
