Minutes

- REC on TA for ARM - still work in progress; will not be ready for SEBA on TA for ARM for Release 2 self-certification
- Validation Lab status update
  - Issues with k8s APIs - legacy APIs deprecated in 1.14 and disabled by default in 1.16
  - k8s permissions issue (service accts created by various charts need to have least-privilege requirements spelled out)
  - CI/CD lab requirements for Release 2 are now met - David reviewed SEBA charts installation job
  - David and Julie to work on documentation to complete by 11/15/19 review
- Reviewed status towards self-certification - **milestones MBI1-4 met;** no objections raised from team
  - minor documentation action item for Julie and David
  - Julie update self-reporting table with completion dates for milestones (10/30/19)
  - presentation to TSC needs to be scheduled
