

# R2 Test Document

No additional testing was included for Rover, Unicycle with SR-IOV or Unicycle with OVS-DPDK blueprints in this release.

In R2 ATT validated the Network Cloud Rover and Unicycle SR-IOV on Dell 740XD blueprints. No changes were made to the validation, HW, networking or IP plans compared to R1 other than the validation of a 4 node Unicycle pod. (as described in the example yaml input file previously).
