

SEBA for TA minutes 2020.01.20

Attendees

- Julie Lorentzen
- Ciprian Barbu
- Tom Moore

Agenda

- Discussion/status check - voltha sanity tests for ARM-based system, packer job to build AMI images

Minutes

- Status unchanged from last meeting; integrating changes for packer image needed (Zack looking at this)
- Ciprian looking into kind-voltha/voltctl (follow up from ONF Test Automation brigade)
- Ciprian found some info on how ONAP supported multi-arch and provided background to Zack last week, related link provided below; under investigation on whether similar approach could be utilized for SEBA
 - <https://gerrit.onap.org/r/gitweb?p=ci-management.git;a=blob;f=jjb/ci-management/ci-management-packer-jobs.yaml;h=7d3fd786885e4ec7516ca96c24eaa2d51c97bc0b;hb=HEAD>
- look into developing milestones for SEBA for TA on ARM HW - will need some lead time to ramp up efforts once dependencies resolved
 - still expect custom charts short-term
 - newer versions of Docker images expected
