

REC Project Minutes 2020.01.30

Attendees

- [Paul Carver](#)
- [Alex Antone](#)
- [Cristina Pauna](#)
- [Tina Tsou](#)

Agenda

- Portal testing in progress, multiple commits merged https://gerrit.akkano.org/r/#/q/project:portal_user_interface/portal-onapsdk
- Lab prep work for load testing continues (e.g. identifying machines, network configuration)
- Workload Generator (WLG) in process of review prior to release in LF O-RAN repo. It should be available sometime next week.

Minutes

- Discussion of AUX cluster vs RIC cluster
- YAML files and tar file currently used in CD flow are obsolete but have not been refactored out yet. They are related to the old way of installing the RIC. Work is in progress to move to the new installation procedure.
- Cristina needs to open a ticket for Eric to link Ampere pod 1 to LF Jenkins master
