

µMEC meeting notes

April 6, 2020

- Release 3 review planning
 - April 10 is a holiday, so not a good day to have a review 😊
 - Plan to be ready for documentation review in ~2 weeks
 - Architecture and Installation documents are easy to fix, Testing requires some thinking
- Best way to boot µMEC devices in CI is by using PXE boot
- [Ferenc Székely](#) will work on the lab and build system
- [Tapio Tallgren](#) will fix the architecture document and continue with other documents
