

# REC Project Minutes 2020.04.30

## Attendees

- Paul Carver
- Juha Oravainen
- Ciprian Barbu
- Tina Tsou
- Darrin Vallis
- Alex Antone
- Gao Chen
- Colin Hutchinson

## Agenda

- BluVal testing status

```
hardware
redfish      fails. (Told I need to change the redfish Administrator or create an equivalent with a more complex password. I tried via the BMC gui and was not
              successful. need assistnace.)

20200428 14:26:20.694 - INFO - +----- START KW: BuiltIn.Should Not Contain [ ${result.stderr} ] FAILED${\n} (Failures= ]
20200428 14:26:20.694 - FAIL - '
Running tests...
-----
test_Redfish_Usecase_Checkers_account_management (__main__._RedfishTestCase) ... ERROR:root:Return code 1 from running test in /tmp/Redfish/172.26.16.201/Redfish-Usecase-
Checkers/account_management FAIL (19.395113)s

Checkers/one_time_boot FAIL (26.171341)s
test_Redfish_Usecase_Checkers_power_control (__main__._RedfishTestCase) ... ERROR:root:Return code 1 from running test in /tmp/Redfish/172.26.16.201/Redfish-Usecase-
Checkers/power_control FAIL (77.306661)s
test_Redfish_Usecase_Checkers_power_thermal_info (__main__._RedfishTestCase) ... OK (78.025818)s

os
cyclictest   successful
lynis        successful
ltp          fails (log snippet below) -- this test is no longer needed for validation project for R3, so you can skip it (I know Naga and Indu have had a successful run in the past)

'INFO: creating /opt/ltp/results directory Checking for required user/group ids 'nobody' user id and group found. 'bin' user id and group found. 'daemon' user id and group found.
Users group found. Sys group found. Required users/groups exist. If some fields are empty or look unusual you may have an old version. Compare to the current minimal
requirements in Documentation/Changes. /etc/centos-release /etc/os-release /etc/product-release /etc/redhat-release /etc/system-release CentOS Linux release 7.8.2003 (Core)
NAME="CentOS Linux" VERSION="7 (Core)" [ Message content over the limit has been removed. ] Summary: passed 12 failed 0 skipped 0 warnings 0 incrementing stop
<<<execution_status>>> initiation_status="ok" duration=0 termination_type=exited termination_id=0 corefile=no cutime=0 cstime=0 <<<test_end>>> INFO: ltp-pan reported
some tests FAIL LTP Version: 20190930-169-g262c98c58 ##### Done executing
testcases. LTP Version: 20190930-169-g262c98c58 ##### does not contain 'INFO:
ltp-pan reported all tests PASS'

docker
docker-bench  successful

kubernetes
conformance   successful
kube-hunter   fails with the very common: "False should be true" error. I was able to successfully run kube-hunter on a rec cluster via 'sudo docker run -it --rm --network host
aquasec/kube-hunter'
It found etcd vulnerabilities - (sent email for assistance)
  • Etcd is accessible using insecure connection.
  • Etcd: Remote version disclosure

Vuls          test not available. It has only been added as a test for the lec blueprint (sent email for assistance)
```

## Minutes

- Darrin said the OpenEdge chassis is on its way from Japan to San Jose, should arrive at Ampere lab next week.
- Ciprian provided an update on SEBA for ARM. Jobs are running in CI and they fixed a few issue including increasing timeouts and cleaning up scripts. They are working on getting Robot output and logs sent to LF Nexus. Yesterday he attended the ONS VOLTA face to face meeting as a webinar.
- Tina mentioned that Deutch Telecom was requesting an AT&T ONF contact. The DT contact mentioned that AT&T had asked about running SEBA on ARM. Paul will check on who the AT&T representative to ONF is.
- Tina asked about the TA CI/CD for ARM. Alex indicated that the REC job is done but the RIC installation is not complete. Sometimes the REC job fails due to virtual media failing intermittently. Tina says that Cristina had reported integration as 20% complete on Monday.
