

REC Project Minutes 2020.06.11

Attendees

- [Paul Carver](#)
- [Alex Antone](#)
- [Ciprian Barbu](#)
- [Darrin Vallis](#)

Agenda

- Build 313 deployed successfully in AT&T CD testing lab: https://nexus.akraino.org/content/sites/logs/att/job/Install_REC_on_OpenEdge1/440/console.log.gz
- Alex has made a few recent changes to code for ARM. We need to merge a change in the manifest repo. Paul will follow up on this

Minutes

- Alex described some issues with the NFS server on the Remote Installer. This is running on the jump server in the UNH lab for the ARM environment. (Found the issue and submitted a fix for review: <https://gerrit.akraino.org/r/c/ci-management/+3565>)
 - Ciprian has been working on getting SEBA running on IEC working on ThunderX 2 pod in UNH lab
- ☒ ~~IEG-36~~ - [IEC][SEBA] Investigate using Akraino UNH ThunderX2 Pod 2 for SEBA validation DONE
- The plan is to run SEBA CI jobs in Akraino lab.
- Darrin reported that they have installed REC a bunch of times on the Ampere servers in their lab. They have setup the VPN and one of their engineers is going to verify that the same installation can be done over VPN. He will train Darrin and then Darrin will share with Cindy.
