REC Project Minutes 2020.10.08

Attendees

- Paul Carver
- Darrin Vallis
- Tina Tsou

Agenda

- Discussion of cabling for Arm server cabling

Minutes

- Detailed discussion of cabling and networks for the Arm OpenEdge setup. Paul will redo the diagram on the Intel page Radio Edge Cloud Validation Lab to look more similar to the one on the Arm page Radio Edge Cloud Validation Lab (ARM64) so that they can be directly compared for differences (i.e. the Intel based server uses both a PCIE NIC and an OCP NIC for a total of four SFP ports and uses a single BMC port for the entire chassis whereas the Arm server uses only one dual port NIC but has separate LOM and BMC ports on every blade.
