REC Project Minutes 2021.02.04

Attendees

- Paul Carver
- Tina Tsou

Agenda

- REC release 4 security fixes complete. Changes reviewed by Randy for security committee
- Ongoing troubleshooting of build problem for Arm - problem related to lack of disk space somewhere, unknown where

Minutes

- Paul will reach out to Alex to see if he can provide any assistance in identifying where the disk space issue is. Troubleshooting is complicated by the fact that the sandbox environment doesn't provide direct access to VMs and auto-deletes jobs after a time expiration. The basic problem is a lack of disk space, but it is not physical disk space or VM disk space, it's something inside a container or image nested within the build process that is hitting a limit.
- We also discussed the colaboration with O-RAN WG6 and Lucian's questions. The answers depend on what next steps we take with the seed code originally provided by Nokia.
