

Akraino BluVal Requests

Blueprints that have to run the BluVal testing and meet the following criteria should submit their information in the chart below to have the vulnerability considered for an exception:

- Running at least the minimum OS version required by the Akraino BluVal
 - Ubuntu
 - CentOS
 - Debian
 - Fedora
 - Suse Enterprise Server
- So far we will provide a new version to support K8s v1.18 and if any BP need to support higher version or special container runtime, you can fill in your requests here:

[illegible]
