

Nexus Akraino Repository (MEC-based)

This section contains the guide to Nexus Akraino Repository.

What is Nexus Akraino Repository:

It is a repository provided by Linux Foundation, on which the logs need to be pushed by each blueprint through Jenkins. To push the logs [continuous integration continuous delivery/deployment \(CICD\)](#) helps you get your blueprint an approval by the Akraino committee.

How to get access of Nexus Akraino Repository?

Before applying for the access rights, you need to:

- have a [Linux Foundation ID](#):
 - Recommendation: Please create an ID specifically for this purpose at [Linux Foundation ID](#), rather than using a personal [Linux Foundation ID](#)
 - think of a **log directory name**, where you plan to push logs through [Jenkins](#):
 - Recommendation: Provide a name like **pred-vanet-mec**, where:
 - [pred-vanet-mec](#) represents your gerrit repository
 - submit a ticket at JIRA with the
 - subject: **"Request to grant external log pushing permissions to [nexus.akraino.org](#)"**
 - mention: [Linux Foundation ID](#), log directory name, blueprint name/link
-
