Metaverse Area

Overview

haihui wang

Metaverse is a new digital world to help build human society. People's contact goes into a fully fresh phase. It needs more new technology to support it.

Blueprints aim to provide what Metaverse needs. The direction towards metaverse makes a challenge to LF Akraino blueprints. Also generate new chance blueprints.

In the future our life is full of metaverse stuff and everywhere it is. Meta life will become a very important part for mankind.

Foundation of the metaverse must be secure, reliable, flexible, extendable. High speed networks like 5G may be a hard requirement for metaverse.

Rapid development in the metaverse appears very soon because more and more people want to join in.
