

ELIOT R6 IOTGateway API documentation

Introduction

As part of this release ELIOT Blueprint are releasing few API's which can be used by other Akraino Blueprints or Non Akraino Blueprints / Projects. The API's given are for the IOT devices and data management(EdgeX), and Application Orchestration & Management (EdgeGallery provided APIs in close proximity with MM1 & MM3) & Service Management API's.

EdgeGallery is an independent opensource, more details can be found at <https://www.edgegallery.org/en/>

In this release ELIOT are exposing API's from upstream projects related to :-

1. IOT devices management APIs (EdgeX)
2. IOT data management APIs (EdgeX)
3. IOT system management APIs (EdgeX)
4. Application Orchestration APIs
5. Application Package Management APIs
6. Application Life Cycle Management
7. MEC Service Management.

API Definitions

IOT device management API

<https://github.com/edgexfoundry/edgex-go/blob/master/openapi/v1/core-command.yaml>

<https://github.com/edgexfoundry/edgex-go/blob/master/openapi/v1/core-metadata.yaml>

IOT data management API

<https://github.com/edgexfoundry/edgex-go/blob/master/openapi/v1/core-data.yaml>

IOT system management API

<https://github.com/edgexfoundry/edgex-go/blob/master/openapi/v1/system-agent.yaml>

Application Orchestration Interface
