Akraino Technical Meetings 2022 Spring

A few months ago, more than 60 engineers gathered to participate in the Akraino technical workshop spring, sponsored by LF Edge.
Attendees participated in-person at the HanaHaus + Blue Bottle Coffee in California.
The technical meeting is the fourth and the number of participants and presentations has increased with each meeting.
This time, there were about 30 presentations on the trend of edge computing.

In this workshop, we introduced and discussed the Akraino blueprint, the LF Edge project,
other edge-related community trends, and the trends of companies working on the edge business.

In addition, we dealt with a wide range of topics in the edge domain:
devices, IoT,robotics, networks, computing, applications, cloud, and security.
This workshop will promote collaboration within and outside of the akraino project.
It will contribute to the realization and popularization of edge computing.

If you missed it, please check the link below for presentation materials and recordings.

Agenda

03/08/2022 - 03/10/2022 Akraino Technical Meetings - Spring - Akraino - Akraino Confluence
