Version 1.1.1 is unaffected and will be supported until September 2023. Earlier versions than 1.1.1 are not supported and should be upgraded. The OpenSSL team plans to disclose the vulnerability at the time they release the 3.0.7 fix tomorrow, November 1 between 1300 and 1700 UTC. Details will be made public at that time. Daniil Egranov There is a possibility that blueprints using applications with dependencies on the OpenSSL are affected by the issues (CVE-2022-3786 and CVE-2202-3602). All blueprint owners including the OpenSSL in their solutions must update them with OpenSSL 3.0.7 (once the OS vendors release updates or manually).
