ONAP

ONAP: Home

https://www.onap.org/

ONAP Community wiki:

https://wiki.onap.org/

There are two broad types of active activities:

(1) How to deploy part of ONAP components to the Edge

(2) How to enable ONAP to, collaboratively with the Edge orchestrator, deploy/manage VNFs in the Edge.

Questions for ONAP Edge Automation: (04/08/2019)

1. What is the plan for the ONAP Edge project for El Alto, especially as it relates to Akraino?
2. Are there plans to bring Edge-based use cases, and functional requirements to El Alto?
   a. Will these requirements come in through existing ONAP Project Components (e.g., MultiCloud, OOF etc)?

   These are the edge related ***proposed*** use cases and functional requirements for ONAP El Alto.

   - Distributed Analytics as a Service (Continuation from R4)
   - K8S based Cloud region support (Continue from R4)
3. What are the planned ONAP Architecture changes to support the ONAP Edge work?

   Work in progress for El Alto and Beyond

   - Edge Automation through ONAP Arch. Task Force - Distributed Management (ONAP etc.) components

4. What is the status of OSAM in ONAP?

   Slowly progressing -- https://wiki.onap.org/display/DW/Release+4+%28Dublin%29+Use+Cases+and+functional+requirements
5. Are there any current or planned POCs for ONAP Edge use cases?

   Distributed Analytics as a Service was a PoC in Dublin.
